# 

Kolon Biotech is a Contract Development and Manufacturing Organization with specialty in cell therapy products. With highly skilled teams, we can support your journey from the initial manufacturing to the final commercialization.

## **Customization capabilities to meet** client's specific manufacturing needs

- Capable of process improvement as well as new process development including scale-up
- · Manufactured various types of CTx related products

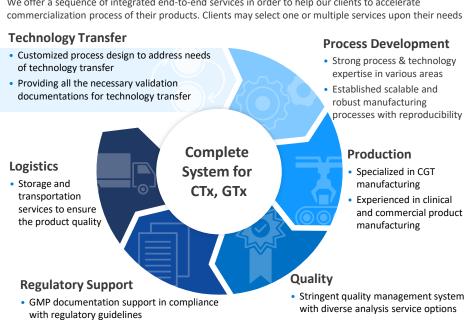

### Clinical to commercial manufacturing capabilities

- Experienced in a wide range of batch sizes and scales
- · Quality system complying with cGMP regulations

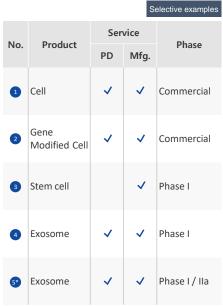

## **End-to-End Support**

We offer a sequence of integrated end-to-end services in order to help our clients to accelerate

## Strong Track Record

#### \* : Under discussion

### Flexible Facilities

We have two facilities which can offer full services & equipment necessary to meet the growing demand for cell therapy development/manufacturing

#### B1 Plant - 2,230m<sup>2</sup>

#### B2 Plant - 14,700m<sup>2</sup>

3rd floor can be flexibly customized to meet the request of client

# 7,630m<sup>2</sup> **Number of Cell Suites** Clean Room Area

# **Specialty in Process** Improvement for Scale-up

We have demonstrated numerous success cases through efficient tech transfer, including process improvement, development and optimization to scale up the production

#### **Process Improvement**

Improved manufacturing process to establish a closed & automated cell culture system with Kolon Biotech's own platform

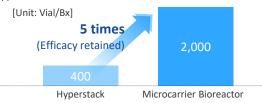

No. of Operators Process Time

Productivity

#### **Novel Process Development**

Experience of successful scale-up based on application of innovative adherent cell culture method
